Reason for applying for a job

I am a tester with nine months of commercial experience on high load projects (fintech/e-commerce). I have experience working as the only QA on the project and as part of a team. I know the theory of testing and can effectively apply it in practice. I want to work in a friendly team on interesting projects that allow me to realize my abilities and opportunities. I am easy to learn, not a conflict person.

Skills

Bug Tracking Systems: Jira

Test Management Systems: TestRail, Confluence

OS: Windows, Android, Linux(GitBash)

Tools: Developer Tools (F12), Postman, Swagger, Apache Jmeter, PICT, Browserstack, Selenium IDE, TestNG, Maven, Git, Amplitude Event Explorer, Яндекс. Метрика

Programming languages: HTML, CSS, Java (beginner)

IDE: IntelliJ IDEA

Databases: MySQL

Office software: Google Docs/Sheets, Excel, MS Word

Languages Proficiency: English (B1)
